Gluten Free refers to the product containing no detectable gluten at a limit of quantification of 5ppm.

*By FSANZ definition low lactose (not more than 2 g per 100 g).²

[^] and other nutrients.

Contains soy, milk.

Ingredients: Water, hydrolysed corn starch, maltodextrin, VEGETABLE OILS (high oleic sunflower oil, soy oil, canola oil), milk protein concentrate, CASEINATES (sodium caseinate, calcium caseinate), sucrose, oligofructose (FOS), MINERALS (magnesium chloride, potassium citrate, sodium citrate, potassium phosphate dibasic, magnesium sulphate, potassium hydroxide, potassium chloride, ferrous sulphate, zinc sulphate, manganese sulphate, cupric sulphate, sodium molybdate, chromium chloride, sodium selenate, potassium iodide), emulsifier (322), flavouring, choline chloride, VITAMINS (ascorbic acid, niacinamide, calcium pantothenate, Vitamin E, pyridoxine hydrochloride, thiamin hydrochloride, riboflavin, Vitamin A palmitate, folic acid, biotin, phyloquinone, Vitamin D₃, cyanocobalamin), taurine, l-carnitine. May contain: calcium carbonate.

Gluten Free refers to the product containing no detectable gluten at a limit of quantification of 5ppm.

*By FSANZ definition low lactose (not more than 2g per 100g).²

[^]and other nutrients.

Contains soy, milk.

Ingredients: Water, maltodextrin, sodium and calcium caseinates, corn oil, sucrose, soy protein isolate, MINERALS (potassium citrate, magnesium chloride, calcium phosphate tribasic, sodium citrate, potassium phosphate dibasic, ferrous sulphate, potassium chloride, zinc sulphate, manganese sulphate, cupric sulphate, sodium molybdate, chromium chloride, sodium selenate, potassium iodide), emulsifier (322), flavouring, VITAMINS (choline chloride, ascorbic acid, dl-alpha tocopheryl acetate, niacinamide, calcium pantothenate, pyridoxine hydrochloride, thiamin hydrochloride, riboflavin, Vitamin A palmitate, folic acid, biotin, phylloquinone, Vitamin D₃, cyanocobalamin), stabiliser (407). May contain: sodium chloride, magnesium sulphate.

ENSURE PLUS HN RTH

Ensure Plus HN RTH 1.5 kcal/mL is a high energy, complete and balanced, low residue tube feed for the dietary management of patients with, or at risk of developing, disease-related malnutrition.¹¹

7. PHARMAC INFORMATION

Breast milk is best for babies. Professional advice should be followed before using an infant formula. Introducing partial bottle-feeding could negatively affect breast feeding. Good maternal nutrition is important for breast-feeding and reversing a decision not to breast-feed may be difficult. Infant formula should be used as directed. Proper use of infant formula is important to the health of the infant. Social and financial implications should be considered when selecting a method of feeding.
